

SR2

What tasks are unfinished from sprint 2?

- ACS speedometer

What practices should we continue doing next sprint?

- Having consistent standup meetings
- Contacting product owners when needed
- Following good gitflow
- Having properly formatted commit messages

What are some new practices that we might want to use next sprint?

- Having contingency plans for the demo in case of technical issues

What are some harmful practices that we should stop doing?

- Having problems just before or during the demo
- Tickets not immediately being moved once started on or finished
- Misplanning sprints

What were some bad experiences during sprint 2?

- Pull requests taking too long to be approved
- Package.json had conflicts in develop branch that caused compilation errors

What were some good experiences during sprint 2?

- Group maintained good coordination and communication
- Main features, which were the main goal for sprint 2, were finished on time and properly
- Pull requests were made for each finished feature
