The main objective of this sprint is complete picks and predictions as well as finishing trivia so solo sessions as well as challenging other users on the radar list to a trivia game.

BIN-115	Challenge users - 5
BIN-120	Preseason picks - 3

What problems do you foresee for this sprint?

Setting up picks and predictions is going to be a bit of a challenge, especially connecting to the nba module to assign nba players as picks. Finishing up trivia is also going to be a big task since we have both solo and “play with friends” options for the users to select.
