

# Sprint 2 Planning meeting

## Which stories did you pick for sprint 2 and why?

The main objective of this sprint was setting up “Zone” and Radar. Additionally, we were also able to incorporate activation emails and password resets. Another big part of this sprint was setting up redux which would enable us to write clean code and access states from anywhere in any component. Finally, we caught up on some of the remaining work from sprint 1 such as the profile page. The reason we picked these tasks as “Zone” is the first screen that pops up after logging in/signing up. Radar was an explicit ask from the client for this sprint. Listed below are the user stories we have picked for this sprint along with their estimates.

BIN-4 Access Open Court - 8

BIN-8 Update profile - 3

BIN-10 View other users' profiles - 1

BIN-50 Radar List - 5

BIN-6 Reset Password - 5

## What problems do you foresee for this sprint?

A big challenge would be setting up redux as it is a very painstaking process to do so. We also anticipate some troubles with account activations and password resets which would require a lot of work. Finally, there might be some unanticipated problems with setting up Zone.

## Attendees

- Anirudha Kanodia
- Yousuf Madi
- Ali Al-Rawaf
- Justin Mach
- Mohamed Moussa
- Kenneth Daniel
- Danny Samara
- Warden from SportCred
- Scrum master Swarup
