

Sprint 3 Planning meeting

Which stories did you pick for sprint 3 and why?

The main objective of this sprint was setting up Debates. We decided on this particular task as it was requested so by the client. Additionally, we are going to improve some of the styling of the overall app.

Bin-20: Create debates - 5

Bin-15: View debates - 3

Bin-18: Debate with other users - 9

Bin-83: View other people's profiles - 1

Bin-51: Notifications - 5

What problems do you foresee for this sprint?

A big challenge is time management in this sprint as all of us have several midterms and assignments for other courses. Additionally, setting up the inbox is going to be very challenging.
